

Cambridge University Hospitals NHS Foundation Trust

Statement of Purpose

July 2020

Service Provider

Cambridge University Hospitals NHS Foundation Trust

Headquarters:

Addenbrooke's and The Rosie Hospitals
Hills Road
Cambridge
CB2 0QQ

Introduction - Our Hospitals & Services:

Cambridge University Hospitals NHS Foundation Trust (CUH) provides accessible, high-quality healthcare for the local people of Cambridge, together with specialist services, dealing with rare or complex conditions for a regional, national and international population. The Trust is recognised as a centre of excellence and innovation with many of the hospital specialists being leaders in their field.

CUH also provides satellite and outreach services at other locations to meet the needs of patients, e.g. in other hospitals, GP practices, and in patients' homes. On occasion we outsource treatment to the independent sector although we retain notes about our patients.

Our commitment to our patients and our community is as an open, accountable and responsive organisation that fosters patient and public involvement. The Trust achieved NHS Foundation Trust status in July 2004 and as such has a Council of Governors and a membership of approximately 20,000. This comprises of patients, staff and members of the public who are actively involved with the Trust, ensuring that our services reflect the needs of those using them.

Our headquarters is Addenbrooke's and the Rosie Hospitals in Cambridge. Addenbrooke's Hospital provides emergency, surgical and medical care for local people and is the Major Trauma Centre (MTC) for the East of England. It is also a regional centre of excellence for specialist services such as transplantation, cancer, neurosciences, paediatrics and genetics. Based on the same site as Addenbrooke's, the Rosie Hospital is a women's hospital and the regional centre of excellence for maternity care.

Our Vision & Future:

CUH's vision is to improve people's quality of life through innovative and sustainable healthcare. CUH is well positioned to enable the integration of our three core activities of clinical care, research and teaching through its position as:

- A local District General Hospital for the Cambridgeshire community;
- A specialist hospital on a supra-regional and national basis;
- A teaching hospital for the University of Cambridge; and
- A major academic and clinical research centre

CUH's mission to provide outstanding care, teaching and research, with a local focus is supported not only through the high calibre of its workforce and continuing service innovation but as a partner organisation in the development of Cambridge's biomedical campus. Royal Papworth Hospital's relocation to the Campus in 2019/20 as well as Astra Zeneca's decision to position their headquarters on the campus presents opportunities for collaboration in continuing healthcare excellence.

CUH's Strategy:

In order to achieve our vision, the Board has committed to a refreshed strategy acknowledging our challenges and our championing our strengths. CUH's strategy aims are:

- To become sustainable by 2021 across finance, care quality, teaching and research
- To build on its position at the centre of a biomedical hub
- To maximise the benefits for patients, staff and the UK economy through four major programmes of work over a 3-5 year time period:
 1. Improving patient journeys – strengthening services through productivity improvement and pathway redesign
 2. Working with our local communities – implementing the STP to deliver enhanced health and better care closer to home
 3. Strengthening the organisation – improving the leadership, governance and functional capability of CUH
 4. Contributing regionally, nationally and internationally – making the most of CUH's opportunities in highly specialised services, teaching and bioscience research

All four programmes are focused on improving the quality, safety and experience of care for our patients. The Board believes the programmes are complementary and together will support the delivery of the strategy.

Our Values:

Our values are 'Together - Safe, Kind and Excellent', and are at the heart of patient care, defining the way we work and behave.

Partnership Working:

Our commitment to build and maintain strong and collaborative relationships with the research community, NHS and social care organisations supports our aim to ensure patients get the right care in the right place at the right time. We are a key member of the Cambridgeshire and Peterborough Sustainability and Transformation Partnership.

Registration with the Care Quality Commission

The Trust is registered with the Care Quality Commission (CQC) to deliver the regulated activities at the set locations as described below. The Trust is committed to the ongoing maintenance of compliance with the Care Quality Commission's 'Fundamental Standards' and will monitor compliance against the standards on an ongoing basis through internal monitoring processes.

For further information on the Care Quality Commission's fundamental standards, please follow the following link to their website: <http://www.cqc.org.uk>

If you require any further information about our services, have any concerns regarding your care or would like to make a comment or complaint, please click on the following link:

http://www.cuh.org.uk/addenbrookes/patients/pals/pals_index.html

Regulated activities and Locations

The Trust is registered with the Care Quality Commission to provide the following regulated activities in the following locations:

1. Surgical procedures

Location: Addenbrooke's and The Rosie Hospitals, Hills Road, Cambridge, Cambridgeshire, CB2 0QQ.

Addenbrooke's and The Rosie Hospitals provide general and specialist adult and paediatric surgery in Cambridge on an inpatient, day case and outpatient basis as well as for emergency patients and has in excess of 37 operating theatres to support this activity.

Surgical specialties provided include General Surgery, Ear, Nose and Throat, Ophthalmology, Oral and Maxillofacial Surgery and Orthodontics, Orthopaedics and Trauma, Plastic Surgery, Transplantation, Urology, Neurosurgery, Gynaecology and Paediatric Surgery.

The Trust has a large Anaesthetic Department to support the surgical services offering general, local and regional anaesthetic techniques to patients, in addition to the provision of a designated Pain Management Service.

Location: Princess of Wales Hospital, Lynn Road, Ely, Cambridgeshire, CB6 1DN.

The Trust performs day case surgery at the Princess of Wales Hospital in Ely. A range of surgical specialties are provided including Maxillofacial, Plastics, Orthopaedics, General Surgery, Chronic Pain interventions and Urology, using a mix of general and local anaesthetic techniques. The service is provided to patients from age 18 and above who are suitable for day surgery.

Location: Cambridge IVF, Kefford House, Maris Lane, Trumpington, Cambridge, CB2 9LG.

Cambridge IVF is a purpose built assisted conception unit that opened in September 2011. It offers a range of fertility treatments to NHS patients from across the East of England and to those funding their own care. The service includes procedure rooms/recovery, scanning and laboratory facilities in addition to private areas for counseling and confidential discussions. The unit is licensed and regulated by the HFEA,

however as Cambridge IVF also undertakes egg collection and embryo transfer this location is also registered under the Surgical Procedures regulated activity.

Key Satellites (Surgery)

Hinchingbrooke Hospital, Hinchingbrooke Park, Huntingdon, Cambridgeshire PE29 6NT.

All satellites at which surgical specialties are supported are given in the Appendix.

2. Treatment of disease, disorder or injury

Location: Addenbrooke's and The Rosie Hospitals, Hills Road, Cambridge, Cambridgeshire CB2 0QQ.

The Trust provides emergency, medical and surgical services for the treatment of disease, disorder or injury on an inpatient, day case and outpatient basis for both elective and emergency patients of all ages.

CUH became the regional Major Trauma Centre (MTC) on 2 April 2012 as part of the East of England Trauma Network. The multi-disciplinary team work together with a network of emergency departments, acute and specialist hospitals, the ambulance service and others to provide dedicated trauma care capabilities around the region.

Addenbrooke's Emergency Department deals with emergency admissions of all types, including those patients who are referred by their GP or who self-present, or are brought in by the Ambulance service. The Emergency Department has a dedicated paediatric area for the assessment and treatment of children.

Medical specialties provided by the Trust include a wide range of specialist and non-specialist services including Acute Medicine, Respiratory, Allergy, Cardiology, Clinical Pharmacology, Dermatology, Endocrinology and Diabetes, Gastroenterology and Endoscopy, Genito-urinary medicine, Hepatology, Medicine for the Elderly, Metabolic Bone Disease, Metabolic Medicine, Renal Medicine, Rheumatology, Neurology, Rehabilitation, Disablement Service, Stroke services and Oncology.

The provision of treatment for disease, disorder and injury is supported by established Physiotherapy, Occupational Therapy, Radiology, Pharmacy and Dietetic Services. In addition, critical care facilities are provided including an Adult Intensive Care Unit, a High Dependency Unit, a Neuro Critical Care Unit and a Paediatric Intensive Care Unit.

Various outpatient clinics are provided at regional hospitals; these include patients on the organ transplant pathway (Transplant Outreach Clinics)

Key Satellites (Dialysis Units)

Hinchingbrooke Hospital, Hinchingbrooke Park, Huntingdon, Cambridgeshire PE29 6NT

West Suffolk Hospital, Hardwick Lane, Bury St Edmunds, Suffolk IP33 2QZ

*Queen Elizabeth Hospital, Gayton Road, Kings Lynn, Norfolk PE30 4ET
Cambridge Dialysis Unit, Unit E, Beadle Industrial Estate, Cambridge CB5 8PD.*

The Trust operates four dialysis units in addition to the unit based at the main Addenbrooke's location. These are based at Hinchingsbrooke Hospital, Queen Elizabeth Hospital King's Lynn, West Suffolk Hospital and at Cambridge Dialysis Unit, a purpose-build centre in Cambridge. These units provide renal replacement therapy for patients with renal failure in East Anglia.

Location: Princess of Wales Hospital, Lynn Road, Ely, Cambridgeshire, CB6 1DN

Outpatient activities are provided at The Princess of Wales Hospital; these include Maxillofacial, Dietician and physiotherapy services and patients on the organ transplant pathway.

Location: Hinchingsbrooke Hospital, Hinchingsbrooke Park, Huntingdon, Cambridgeshire, PE29 6NT

Various outpatient clinics are provided at Hinchingsbrooke Hospital; these include patients on the organ transplant pathway and those attending cardiovascular and metabolic outpatient clinics.

Location: Kefford House, Maris Lane, Trumpington, Cambridge, CB2 9LG

In addition to the IVF services provided at Kefford House, satellite pharmacy services are also provided at this location.

All satellite sites at which treatment of disease, disorder or injury are supported are given in the Appendix.

3. Maternity and midwifery services

Location: Addenbrooke's and The Rosie Hospitals, Hills Road, Cambridge, Cambridgeshire, CB2 0QQ.

The Trust provides full maternity services through the Rosie Hospital including antenatal, intra-partum and post-natal care. It currently undertakes approximately 6,000 births annually.

Facilities include Antenatal and Postnatal wards, an Outpatient facility, Fetal Assessment Unit, Scan Department, Theatre suite, Delivery Unit (including home-from-home facilities and a birthing pool), Neonatal Intensive Care Unit (NICU) including Special Care Baby Unit (SCBU) and Community Neonatal Team.

In addition, the maternity service provides the Rosie Birth Centre which includes birthing rooms and postnatal beds for the delivery of midwifery led one-to-one care.

A comprehensive anaesthetic service supporting both elective and emergency procedures

is provided, in addition to a pain management service including a 24 hour epidural service for labour.

Teams of Community Midwives are based at The Rosie Hospital, providing antenatal and postnatal care to the women of Cambridge and the surrounding geographical area; the details of community teams are given in the appendix.

4. Termination of pregnancies

Location: Addenbrooke's and The Rosie Hospitals, Hills Road, Cambridge, Cambridgeshire, CB2 0QQ.

As part of the Trust's gynaecological services, a termination of pregnancy service is provided. The service offers both medical and surgical termination of pregnancy. Advice and support is also provided by specialist nursing staff, a midwifery counselor and bereavement coordinator.

5. Diagnostic and screening procedures

Location: Addenbrooke's and The Rosie Hospitals, Hills Road, Cambridge, Cambridgeshire CB2 0QQ.

Our main pathology services are based in Cambridge at Addenbrooke's hospital and The Rosie Hospital and offer a comprehensive range of services including Clinical Biochemistry and Immunology; Histopathology and Cytology; Clinical Microbiology (which is provided by Public Health England on site); Serum Screening; Clinical Haematology and Blood Transfusion; Tissue Typing, Tissue Bank, Point of Care Testing, Haematopathology and Oncology Diagnostics, Mortuary and Medical Genetics service.

A wide range of diagnostic and screening procedures including X-ray, Ultrasound, CT, MRI, PET/CT, Endoscopy and other specialist imaging techniques are provided at Addenbrooke's Hospital and The Rosie Hospital and the locations detailed below to patients of all ages.

Note: The regulated activity of "diagnostic and screening procedures" also encompasses physiological measurement, where equipment is used, e.g. measuring blood pressure using a sphygmomanometer. Therefore, all of the Trust's individual locations are registered to provide this activity.

Location: Princess of Wales Hospital, Lynn Road, Ely, Cambridgeshire, CB6 1DN.

Location: Hinchingsbrooke Hospital, Hinchingsbrooke Park, Huntingdon, Cambridgeshire, PE29 6NT.

Location: Kefford House, Maris Lane, Trumpington, Cambridge, CB2 9LG.

Additional satellites are listed in the appendix.

6. Accommodation for people who require treatment for substance misuse

Location: Addenbrooke's and The Rosie Hospitals, Hills Road, Cambridge, Cambridgeshire CB2 0QQ.

In conjunction with Cambridge and Peterborough NHS Foundation Trust (CPFT), the Trust provides a service to patients who require treatment for substance misuse, mainly alcohol and drug-related problems. Patients are screened, both on an elective and non-elective basis e.g. through the Emergency Department. There is a specialist Drug and Alcohol Liaison Nurse (DALN) and a consultant for Substance Misuse who assess patients with alcohol or substance misuse problems in order to facilitate safe management of their addiction whilst in hospital and also liaison with community services when discharged.

7. Assessment or medical treatment for people detained under the Mental Health Act 1983

Location: Addenbrooke's and The Rosie Hospitals, Hills Road, Cambridge, Cambridgeshire CB2 0QQ.

The Trust cares for patients detained under the Mental Health Act who need hospital treatment. The liaison psychiatry service ensures that patient's mental health needs are met whilst they are in hospital. The Trust has appointed a Consultant Child And Adolescent Liaison Psychiatrist, within Children's Services.

The Trust liaises with the relevant mental health trust to prepare for a patient's discharge. The Trust has 24-hour cover to deal with psychiatric emergencies and to provide a review on request.

8. Response to Covid-19 pandemic

Cambridge University Hospitals NHS Foundation Trust is committed to working closely and collaboratively with the independent healthcare sector which is supporting the national response to the Covid-19 pandemic by providing increased healthcare capacity in our region to continue safe and effective NHS treatment.

Our commitment includes provision of staff and expertise to the independent hospital sector supporting:

- *oncology services (surgery and medical care),*
- *access to radiofrequency ablation,*
- *oncology and haematology inpatient areas,*
- *clinical immunology outpatient care.*

Furthermore, we are committed to developing and delivering adjusted care pathways utilising expertise from our allied healthcare professionals (e.g. phlebotomists and pharmacists) in order to support the continuation of treatment for our patients with our colleagues in the independent sector.

Providers that we will be working with under the NHS England and NHS Improvement National Covid Contract include:

Nuffield Health Cambridge Hospital, of Trumpington Road, Cambridge, CB2 8AF, part of **Nuffield Health** whose registered office is at Epsom Gateway, Ashley Avenue, Epsom, Surrey KT18 5AL

Spire Healthcare Limited trading as Spire Cambridge Lea Hospital, whose registered office is 3 Dorset Rise London EC4Y 8EN

Nominated Individual

The Trust's nominated individual responsible for overseeing all registered activities in all locations is:

Mr. Roland Sinker
Chief Executive
Cambridge University Hospitals NHS Foundation Trust
Hills Road
Cambridge
CB2 0QQ

Trust telephone number: 01223 245151

Trust website: www.cuh.nhs.uk

Appendix - Table of Satellites to Addenbrooke's & The Rosie Hospitals
